Subject: Gunnison Copper project

Dear Nancy,

I am writing to comment on the EPA proposed approval of an underground injection permit for the Gunnison Copper Project.

In-situ mining has a 100% failure rate and this mine has the potential to pollute/deplete the water supply here in Dragoon Arizona.

The water they plan on using is not recharge water, it is water left over from the last ice age and once used it is gone forever.

I hope the EPA has second thoughts and will refuse this permit.

Sincerely

John Miller
